SUMMARY

Business and data analyst with experience in GTM analytics, account scoring, and BI reporting across SaaS, CPG, and public health. Comfortable from raw data consolidation through executive-facing dashboards.

SKILLS

Analytics & BI: SQL, Python (pandas, scikit-learn, XGBoost), R, Excel, Power BI, Tableau, Looker Studio

Platforms: Salesforce, Marketo, ZoomInfo, JIRA, GitHub, Jupyter/Colab, Microsoft Office Suite

WORK EXPERIENCE

RainFocus — *Business Systems Intern* → *Administrator*

Lehi, UT | May – Oct 2025

Administrator (Part-Time)

- Owned ongoing **Salesforce** and **JIRA** workflow requests independently after converting from internship, maintaining GTM and finance data accuracy.
- Scoped and documented a data hygiene backlog across **Salesforce** and **Marketo**, flagging duplicate records and field inconsistencies to support a cleaner pipeline for the sales team.

Business Systems Intern

- Consolidated **Salesforce**, **Marketo**, and **ZoomInfo** into a unified **35,000+** row GTM dataset for account-level analytics across sales and marketing.
- Built an **XGBoost** account-scoring model — engineering temporal recency and sales-stage features from raw CRM activity — to surface pre-conversion pipeline signals and prioritize sales outreach.
- Published prioritized account views in **Looker**, reducing manual review time and shaping weekly sales focus for the revenue team.

PepsiCo — *Sales & Insights Intern*

Pakistan | Jul – Sept 2024

- Analyzed **50+** bakery markets to identify expansion opportunities tied to a **10%+** regional revenue growth target, informing distribution prioritization decisions.
- Built a **Tableau** dashboard using **SQL**-aggregated route-level KPIs and sales trends for regional leadership.

Sindh Integrated Emergency & Health Services — *Data Science Intern*

Pakistan | Jun – Jul 2024

- Integrated HR timestamp records for **1,800+** employees in **R**, correcting attendance data and enabling anomaly detection across shift patterns.
- Developed **ARIMA/Prophet** forecasts and a **Power BI** dashboard for the Chief Information Digital Officer to monitor staffing gaps and operational efficiency.

PROJECTS

LedgerSmart — *Cash-Flow Intelligence System*

2025 – Present

- Automated processing of **300–500** monthly transactions in **Python**, consolidating **4–6** ledgers into a single digital workflow and eliminating manual reconciliation.
- Layered cash-flow and spending trend forecasts to give management daily liquidity visibility and early warnings on unusual patterns.

SaaS Analytics Warehouse — *SQL Data Model & BI Dashboard*

2025

- Designed a **SQLite** analytics warehouse with **6** analytical **SQL** views tracking revenue trends, usage behavior, and customer health scores across **238** accounts.
- Built an interactive **Chart.js** dashboard surfacing accounts by health tier, flagging **22** accounts with overdue or written-off invoices and identifying **3** high-usage, below-revenue upsell targets.

Netflix Recommender System — *Collaborative & Content-Based Filtering*

2024

- Built a hybrid recommender in **Python** combining collaborative filtering (**cosine similarity** on user-item matrices) and content-based filtering on genre/metadata to generate personalized title suggestions.
- Evaluated model performance using **precision@k** and **RMSE**, comparing baseline popularity ranking against personalized recommendations across **100,000+** ratings.

EDUCATION

Knox College — BA in Integrative Business Management & Data Science

Expected June 2026

Coursework: Neural AI, Data Mining, Database Systems, Mathematical Statistics, Managerial Finance · **Knox Trustees**

Distinguished Scholarship
