SUMMARY

Business Data analyst building end-to-end systems ETL pipelines and predictive models to executive-facing BI dashboards. Experience across SaaS, CPG, and public health

SKILLS

Technical: SQL, Python (Pandas, Numpy, Scikit-Learn, Matplotlib), R, Excel (Pivot Tables, VLOOKUP), Microsoft 365

Data Visualization: Looker Studio, Tableau, Power BI, KPI Tracking

CRM & Project Tools: Salesforce, Agile/Scrum (Jira & Notion), Slack

WORK EXPERIENCE

RainFocus

Lehi, UT | May – Oct 2025

Business Systems Administrator (Part-Time)

- Automated recurring financial reporting by developing a Python script (Pandas) to extract **Salesforce** data via API, replacing a manual data entry workflow and reducing reporting errors.
- Resolved **20+** cross-departmental Salesforce configuration tickets, gathering stakeholder requirements and engineering validation-rule logic to ensure **data integrity**

Business Systems Intern

- Developed an **XGBoost model** (68% F1-score) by engineering temporal-recency CRM features, utilizing **Cursor AI** to rapidly refactor the Python code and surface pre-conversion lead signals.
- Accelerated pipeline prioritization after the **Sales EVP** adopted the model's account rankings for weekly review, replacing a vendor's black-box scoring system with an editable, internal solution.
- Engineered a unified **35,000+** row GTM dataset by consolidating and deduplicating cross-functional records across Salesforce for the sales and marketing teams

PepsiCo — Sales & Insights Intern

Pakistan | Jul – Sept 2024

- Queried a **50K+ row sales** and distributor database using **SQL** aggregations to evaluate market saturation and engineer KPIs across 50+ regional bakery markets.
- Built a **PowerBI** dashboard mapping customer demand and underperforming local competitors, convincing District Managers to launch PepsiCo products into high-priority bakery accounts.
- Contributed to a strategic GTM pivot that successfully validated a **10%** projected revenue growth target through positive 3-month regional pilot sales data.

Sindh Integrated Emergency & Health Services — Data Science Intern

Pakistan | Jun – Jul 2024

- Engineered a 1,800+ employee forecasting pipeline, utilizing advanced **Excel** data lookups and pivot aggregations to reconcile multi-sheet HR logs before scripting workflows in **R Studio**.
- Developed and deployed an **ARIMA time-series model** that predicted critical operational staffing gaps, analyzing seasonal shift patterns across hundreds of thousands of raw timestamp records.
- Published a live **Power BI dashboard** adopted by the **Chief Information Digital Officer** (CIDO) to track real-time operational efficiency and automate shift-pattern anomaly detection.

TECHNICAL CONSULTING

LedgerSmart — Cash-Flow Intelligence System

Chicago, IL | 2026

- Digitized **\$490K** in annual transactions across **59** client accounts for a B2B manufacturing and trading firm, building a production financial platform (FastAPI, React) that fully replaced a manual bookkeeping workflow.
- Architected a custom data engineering pipeline utilizing **Claude Code** to accelerate development, building an **ETL** orchestration layer that seamlessly ingests raw Excel ledgers into SQLite.
- Saved the business **\$25,700** by deploying a 4-model machine learning pipeline with a **SARIMAX** forecaster that flagged a low-revenue month early, prompting a proactive 15% inventory reduction.

Beats By Dre — Consumer Insights Externship

Remote | 2025

- Engineered a text analytics pipeline in **Python (Scikit-Learn)** to process thousands of survey responses, utilizing NLP sentiment analysis to map the end-to-end consumer journey.
- Uncovered critical customer friction points across product stages, delivering a **Tableau** dashboard and strategy presentation adopted by senior leadership to optimize brand positioning.

EDUCATION

Knox College — BS in Integrative Business Management & Data Science

- Honors:** Knox Trustees Distinguished Scholarship
- Relevant Coursework:** Data Mining, Database Systems, Mathematical Statistics, Advanced Managerial Finance
